

Expense control

In response to growing demand from our clients, we have set up our Expense Control service specifically to assist in improving profitability by giving you the ability to reduce your overhead cost base. The results are delivered rapidly and efficiently through the HWB Expense Control Purchasing Pool.

The Purchasing Pool comprises a select group of reputable supplier-partners, all of whom are committed to delivering substantial savings over typical market prices across the most common overhead spend categories, from office supplies to utilities, insurances to foreign exchange. We also have access to senior procurement specialists from a wide range of industry backgrounds in support of our service. As a result, improved supply agreements through the Purchasing Pool typically deliver savings in excess of 20% across the board, in some cases as much as 50-60%.

Who can benefit from using HWB Expense Control?

Any business that accepts it probably does not have the resource, relationships or product expertise to keep costs to a minimum will benefit from this service.

How does it work?

We agree with you which areas of spend are to be addressed. Using information provided from your invoices and electronic data, we carry out a confidential, free of charge, no obligation costs audit on the prices you are paying. Through our Purchasing Pool partners, we then deliver improved supply agreements, which are typically implemented within four to six weeks of your initial enquiry.

To understand how working with us can save you money and add to your bottom line, contact John Linnard on 07909 531235 or email john@expense-control.co.uk.

A fresh approach to business
